Experience

- May 2014–Current **Senior front-end developer, Experian Consumer Direct.**
Part of the team delivering the responsive redesign of Experian's flagship consumer product, Credit Expert.
- Improving the team's knowledge and understanding of JavaScript through one-on-one mentoring and small group seminars.
 - Found and fixed several critical performance and retention issues with our consumer credit reporting site.
 - Developed the prototype for an upcoming product in ECD's first internal hack day.
- June 2010–April 2014 **Head of web development, ShP Limited.**
Oversaw all of ShP's online operations. Planned/developed new websites and services while driving adoption of new technologies, tools and frameworks.
- Involved at every level of the stack, from our database and web services to back and front end development for our websites.
 - Sole designer and developer of ShP's account management tools, over-the-counter recycling tool and bidding platform.
 - Worked on white label projects for demanding, high-profile clients such as Marks & Spencer, T-Mobile, DSGi, Trinity Mirror and Avios.
- February 2009–June 2010 **Head of IT, ShP Limited.**
During an intense period for ShP, I managed infrastructure and IT services across two sites in addition to my work as a developer.
- Administered Exchange and Active Directory, networking, security and technical support while overseeing all of ShP's online and internal development projects.
 - Demonstrated exceptional time and resource management, flexibility and communications skills.
- October 2008–February 2009 **Web developer, ShP Limited.**
Improved ShP's existing web presence by promoting new ideas and technologies.
- Advocated and drove adoption of the emerging ASP.NET MVC framework.
 - Rebuilt our legacy B2C recycling framework for improved reliability.
 - Championed accessibility and great user experience for new projects.

- September 2005– **Web developer**, *Web Age*.
August 2006 Web development on a LAMP (MySQL/Perl) stack with a focus on e-commerce and SEO.
- Designed and implemented a full CRM for a local NPO.
 - Helped develop a fully in-house e-commerce solution for small businesses.
 - Reduced our most common deployment task from a full day to less than an hour.

Education

- 2008 **BSc Computer Science**, *University of Warwick*.
Subjects studied included software engineering, relational databases, discrete mathematics and algorithms/complexity.
Group project Fully-functional networked EPOS solution with interfaces for administration and customer services.
- 2002 **A-levels**, *Blackpool Sixth Form College*, AABBC.
Mathematics, further mathematics, physics, psychology and general studies
- 2000 **Standard Grades**, *St Joseph's Academy*, 8 at Credit 1 (A/A* GCSE).
Best in year for mathematics, chemistry, physics (2000) and computing (1999).
